

Highly Frustrated Magnetism 2022 in Paris

I have attended the international conference HFM22 held in Paris in 20.-25. June 2022. I presented the results on $\text{SrCu}_2(\text{BO}_3)_2$ up to the saturation field. I could meet the friends in Dresden and our collaborator Prof. F. Mila. I could also meet Dr. I. Živković who wrote the *Physics* article introducing my paper. Thank you very much!
