

Defense of the Master's Thesis has been conducted

Ms. Miyuki Takemura had a final defense of her Master's Thesis, and Mr. Jinbo Wang and Ms. Shiyue Peng had a midterm-defense of their Master's Thesis on January 24th and 25th at the Department of Advanced Materials Science (AMS), Graduate School of Frontier Sciences.

We still have many opportunities for making a great discovery for the human beings. Challenges to unexplored extreme conditions are the key to make the breakthrough.

～From the brochure of the Advanced Materials Science (2021)～

Ms. Takemura presented on “Quest for the insulator metal transition of Ti_2O_3 in ultrahigh magnetic fields ” for 30 minutes.

Mr. Wang presented on “Exciton states of Cu_2O in ultrahigh magnetic fields”, and Ms. Peng presented on “Superconducting-normal transition of cuprate superconductor thin films in ultrahigh magnetic fields” for 20 minutes for each.

(The common language for the midterm defense in AMS is English.)

Happily, all of them have successfully passed.
