

Dr. Yuto Ishii has become the research associate of Matsuda Lab.

Dr. Yuto Ishii has become the research associate of Matsuda Lab at the IMGSL on May 1, 2022. Ishii san joined the lab in April 2020 as a researcher of JSPS and became a project researcher of ISSP in February 2022. He has been working on the synthesis of frustrated magnets and their exotic quantum phenomena. It is envisioned that he will contribute to the development of the research on ultrahigh magnetic fields using destructive magnets.
