

New members come

New M1 student Mr. Zhisheng Wu, who had not been able to enter Japan due to the corona-virus disaster, has made his long-awaited visit to Japan. After a week of quarantine, he has made his debut in research activities & lunch-time football.

Postdoctoral researcher Dr. Akiyoshi Yamada also became an official member in May. He is conducting research in a dual role of theory and experiment. *Mr. Yamada enjoys mountain climbing (see photo). Please let him know if you have any mountain climbing events.*

We now have nine members for the fiscal year 2022. Please look forward to the future development of our research.
