

Izu and India

Four members of Tokunaga Lab, Tokunaga, Kondo, Sudo, and Wu, participated in the Area Research Meeting of the 1000T project held in Izu on Dec. 6-8 and gave presentations, respectively. The workshop was held at a training center in a hot spring resort, and we had a fruitful exchange of opinions both during the day and in the evening. Please look forward to further developments in our research.

On Dec. 8-11, there was an international conference of AC2MP (<https://www.iitp.ac.in/~ac2mp2024/>) at the Indian Institute of Technology Patna, where Tokunaga gave an invited talk on anomalous properties of BiSb in the extreme quantum limit state. The chaotic situation and energetic atmosphere in India were exciting.
